FIG. 58 ATTACHING LIGHTWEIGHT STRUCTURES TO VENEER

1. This detail is limited to 20 square metres each of roof area. Any greater area requires specific design.

2. This detail is designed for attaching lightweight structures to veneers. Such as single carport, sheet metal over flashing, pergolas, etc.

3. This detail has been checked by BRANZ's Structural Engineer.

4. Some Territorial Authorities may require a Producer Statement.

5. Ensure space under roof is not enclosed.

PLEASE NOTE: Never attach a clothes line directly to brick veneer as it is dangerous.
